

Fibre Cable Jointing

NDG has, using Optistar™ products, undertaken a number of projects involving jointing of fibre optic cable and testing of already deployed fibre optic cable networks. We are also familiar with a range of pre-terminated pig tails, GPON Splitters and can terminate fibre cables directly with LC, SC, or FC sockets.

We have an experienced and trained network technicians, along with a dedicated van, splicers, OTDR, light meter, as well as a range of testing equipment for both fibre optic, wired and wireless networks, to help with fault finding and diagnostics on your network.
