

## Short Lengths of Fibre Optic Cable

Sometimes, you just want a short length of cable, or a large patch leads to complete a project or test out some equipment, without having to commit to buying tens or even hundreds of meters of cable, or importing and waiting for the shipment to arrive.

We have a range of Fibre Optic Cable in stock in New Zealand, which we can cut to any length from 1 meter through to 100 meters, and in most instances can ship it to you same day.

We can also terminate patch leads in customised lengths in either SC or LC terminations.

We stock both Single Mode and Multimode fibre optic cable, with fibre counts from 2, 12, 24, 36 and 96 fibre, with our range including Direct Bury, Indoor Outdoor Riser, Air Blown (both ABF and ABC), as well as long length patch leads from 10m to 25m terminated in either LC, or SC (and SC (APC)).
